

Celebrate the bicentennial of Mary Shelley's book
Frankenstein with Professor Steve's new show:

THE SCIENCE OF FRANKENSTEIN

Born of a nightmare fueled by an evening of ghost stories, stormy weather & flickering candlelight, *Frankenstein* has provided 200 years of both mental & visual horrors. It is considered to be the first science fiction novel.

It was one of the first horror movies ever made.
And, it was written by a teenage girl.

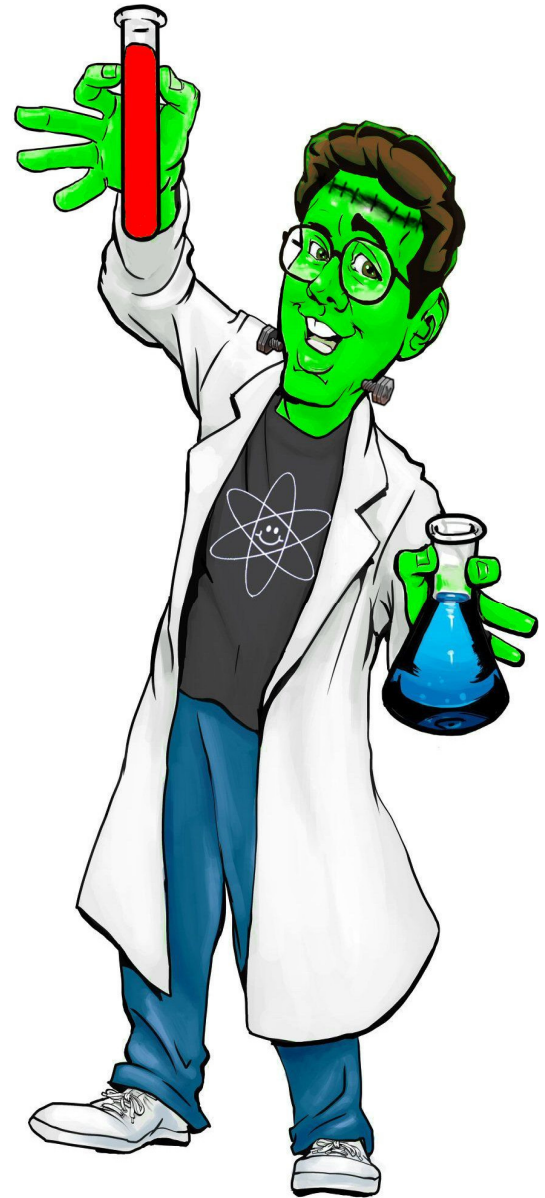

LISTEN as Professor Steve tells the horrific story of Mary Shelley's *Frankenstein*.

MARVEL at the stories of scientists that influenced Mary Shelley, including details about the real "Dr. Frankenstein".

WITNESS the wonder of *Frankenstein* as Prof. Steve demonstrates many of the concepts found in both the book & the movies, including light, anatomy & electricity.

STARE in amazement as Prof. Steve unleashes the electrical power contained in Frankenstein's laboratory with his Jacob's Ladder (17,000 volts), his Wimshurst Static Generator (75,000 volts) & his amazing Tesla Coil (capable of generating almost 750,000 volts of raw electricity).

Fun, interactive, educational & great for all ages!
